NEW TRENDS IN INTELLIGENT SOFTWARE METHODOLOGIES, TOOLS AND TECHNIQUES

Proceedings of the 20th International Conference on New Trends in Intelligent Software Methodologies, Tools and Techniques (SoMeT_21)

Edited by
Hamido Fujita
Hector Perez-Meana
NEW TRENDS IN INTELLIGENT SOFTWARE METHODOLOGIES, TOOLS AND TECHNIQUES

The integration of AI with software is an essential enabler for science and the new economy, creating new markets and opportunities for a more reliable, flexible and robust society. Current software methodologies, tools and techniques often fall short of expectations, however, and much software remains insufficiently robust and reliable for a constantly changing and evolving market.

This book presents 54 papers delivered at the 20th edition of the International Conference on New Trends in Intelligent Software Methodology Tools, and Techniques (SoMeT_21), held in Cancun, Mexico, from 21–23 September 2021. The aim of the conference was to capture the essence of a new state-of-the-art in software science and its supporting technology and to identify the challenges that such a technology will need to master, and this book explores the new trends and theories illuminating the direction of development in this field as it heads towards a transformation in the role of software and science integration in tomorrow’s global information society.

The 54 revised papers were selected for publication by means of a rigorous review process involving 3 or 4 reviewers for each paper, followed by selection by the SoMeT_21 international reviewing committee. The book is divided into 9 chapters, classified by paper topic and relevance to the chapter theme.

Covering topics ranging from research practices, techniques and methodologies to proposing and reporting on the solutions required by global business, the book offers an opportunity for the software science community to consider where they are today and where they are headed in the future.

NEW TRENDS IN INTELLIGENT SOFTWARE METHODOLOGIES, TOOLS AND TECHNIQUES
Frontiers in Artificial Intelligence and Applications

The book series Frontiers in Artificial Intelligence and Applications (FAIA) covers all aspects of theoretical and applied Artificial Intelligence research in the form of monographs, selected doctoral dissertations, handbooks and proceedings volumes. The FAIA series contains several sub-series, including ‘Information Modelling and Knowledge Bases’ and ‘Knowledge-Based Intelligent Engineering Systems’. It also includes the biennial European Conference on Artificial Intelligence (ECAI) proceedings volumes, and other EurAI (European Association for Artificial Intelligence, formerly ECAI) sponsored publications. The series has become a highly visible platform for the publication and dissemination of original research in this field. Volumes are selected for inclusion by an international editorial board of well-known scholars in the field of AI. All contributions to the volumes in the series have been peer reviewed.

The FAIA series is indexed in ACM Digital Library; DBLP; EI Compendex; Google Scholar; Scopus; Web of Science: Conference Proceedings Citation Index – Science (CPCI-S) and Book Citation Index – Science (BKCI-S); Zentralblatt MATH.

Series Editors:
Joost Breuker, Nicola Guarino, Pascal Hitzler, Joost N. Kok, Jiming Liu,
Ramon López de Mántaras, Riichiro Mizoguchi, Mark Musen, Sankar K. Pal,
Ning Zhong

Preface

The integration of Applied Intelligence with Software is an essential enabler for science and the new economy. It creates new markets and opens up new directions for a more reliable, flexible and robust society. It empowers the exploration of our world in ever more depth. However, the software involved often falls short of our expectations. Current software methodologies, tools, and techniques remain insufficiently robust and reliable for a constantly changing and evolving market, and many promising approaches have proved to be no more than case-oriented methods that are not fully automated.

This book explores the new trends and theories which illuminate the direction of developments in this field and which we believe will lead to a transformation in the role of software and science integration in tomorrow’s global information society.

Discussing issues ranging from research practices, techniques and methodologies, to proposing and reporting on the solutions required by global business, the book offers an opportunity for the software science community to think about where we are today and where we are headed in the future.

The book aims to capture the essence of a new state of the art in software science and its supporting technology, as well as to identify the challenges that such a technology will need to master. It contains the extensively reviewed papers presented at the 20th round of the International Conference on New Trends in Intelligent Software Methodology Tools, and Techniques, (SoMeT_21) held in Cancun Mexico, with the collaboration of National Polytechnic Institute, (IPN) Mexico City, Mexico, from 21–23 September 2021. (https://atenea.esimecu.ipn.mx/SOMET2021.html). This 2021 edition of SoMeT also celebrates the 20th anniversary of the conference series, which is ranked B+ among other high-ranking Computer Science conferences worldwide. The 2021 event is supported by the i-SOMET Incorporated Association, (www.i-somet.org) established by Prof. Hamido Fujita.

As ever, the 2021 conference brought together researchers and practitioners to share their original research results and practical development experience in software science and related new technologies.

This volume participates in the conference and the SoMeT series of which it forms

---

1 Previous related events that contributed to this publication are: SoMeT_02 (the Sorbonne, Paris, 2002); SoMeT_03 (Stockholm, Sweden, 2003); SoMeT_04 (Leipzig, Germany, 2004); SoMeT_05 (Tokyo, Japan, 2005); SoMeT_06 (Quebec, Canada, 2006); SoMeT_07 (Rome, Italy, 2007); SoMeT_08 (Sharjah, UAE, 2008); SoMeT_09 (Prague, Czech Republic, 2009); SoMeT_10 (Yokohama, Japan, 2010), and SoMeT_11 (Saint Petersburg, Russia), SoMeT_12 (Genoa, Italy), SoMeT_13 (Budapest, Hungary), SoMeT_14 (Langkawi, Malaysia), SoMeT_15 (Naples, Italy), SoMeT_16 (Larnaca, Cyprus), SoMeT_17 (Kitakyushu, Japan), SoMeT_18 (Granada, Spain), SoMeT_19 (Sarawak, Malaysia), SoMeT_20 (Kitakyushu, Japan).
a part by providing an opportunity for the exchange of ideas and experiences in the field of software technology; opening up new avenues for software development, methodologies, tools, and techniques, especially with regard to intelligent software, by applying artificial intelligence techniques in Software Development and tackling human interaction in the development process for better high level interface. The emphasis has been placed on human-centric software methodologies, end-user development techniques, and emotional reasoning, for an optimally harmonized performance between the design tool and the user.

The word “intelligent” in the full SOMET title emphasizes the need to apply artificial intelligence to issues of software design for systems application, for example, in disaster recovery and other systems supporting civil protection and in other areas where human intelligence is a requirement in system engineering.

A major goal of this volume was to assemble the work of scholars from the international research community as part of the process of discussing and sharing the research experiences of new software methodologies and techniques. One of the important areas addressed is the handling of cognitive issues in software development to adapt it to the user’s mental state. Tools and techniques related to this aspect form part of the contributions to this book. Another subject raised at the conference was intelligent software design in software ontology and conceptual software design in the practice of human-centric information system application.

The book also investigates other comparable theories and practices in software science, including emerging technologies, from their computational foundations in terms of models, methodologies, and tools. This is essential for a comprehensive overview of information systems and research projects, and to assess their practical impact on real-world software problems. This represents another milestone in mastering the new challenges of software and its promising technology addressed by the SoMeT conferences, and provides the reader with new insights and inspiration, as well as concrete material to further the study of this new technology.

The book contains a collection of carefully selected papers, refereed by the reviewing committee, and covering (but not limited to):

1) Software engineering aspects of software security programs, diagnosis and maintenance
2) Static and dynamic analysis of software performance models
3) Software security aspects and networking
4) Agile software and lean methods
5) Practical artifacts of software security, software validation and diagnosis
6) Software optimization and formal methods
7) Intelligent Decision Support Systems
8) Software methodologies and related techniques
9) Automatic software generation, re-coding and legacy systems
10) Software quality and process assessment
11) Intelligent software systems design and evolution
12) Artificial Intelligence techniques for Software Engineering and Requirement Engineering
13) End-user requirement engineering and programming environments for Web applications
14) Ontology, cognitive models and philosophical aspects on software design
15) Business oriented software application models
16) Emergency Management Informatics, software methods and application for supporting Civil Protection, First Response and Disaster Recovery
17) Model Driven Development (DVD), code centric to model centric software engineering

From the 112 high-quality submissions received, we have selected 54 of the best revised articles for publication in this book. The referees in the program committee have reviewed all these submissions carefully, and on the basis of technical soundness, relevance, originality, significance, and clarity, these 54 papers were selected. They were then revised on the basis of the review reports before being selected by the SoMeT_21 international reviewing committee. It is worth stating that there were three or four reviewers for each paper published in this book. The book is divided into 9 Chapters, classified based on paper topic and its relevance to each chapter-related theme, and as follows:

| CHAPTER 1 | Software System with Intelligent Design |
| COMMAND 2 | Software System Security and techniques |
| COMMAND 3 | Formal Techniques for System Software and Quality assessment |
| COMMAND 4 | Applied Intelligence in Software |
| COMMAND 5 | Intelligent Decision Support Systems |
| COMMAND 6 | Document Analytics- based Systems |
| COMMAND 7 | Knowledge Science and Intelligent Computing |
| COMMAND 8 | Ontology in Data and Software |
| COMMAND 9 | Machine Learning in Systems Software |

This book is the result of a collective effort from many industrial partners and colleagues from around the world. We would particularly like to express our gratitude for the support provided by the National Polytechnic Institute, (IPN) Mexico, and for the work of all those authors who have contributed their invaluable support to this work. Most especially, we thank the program committee, reviewing committee and all those who participated in the rigorous reviewing process and the lively discussion and evaluation meetings which led to the selected papers which appear in this book. Last but not least, we would also like to thank the Microsoft Conference Management Tool team for their expert guidance on the use of the Microsoft CMT System as a conference-support tool throughout all the phases of SoMeT_21.

## Chapter 1. Software System with Intelligent Design

Generating Program Identifier Dictionary for Maintaining Legacy Systems  
*Ryo Soga, Genta Koreki, Hideyuki Kanuka, Akira Ioku and Jun Maekawa*  
3  
Protection of Mathematical Formulas Using Function Invariants  
*Arkadiusz Liber*  
13  
Software Protection of Smart Household Appliances Against Over-Exploitation  
*Arkadiusz Liber*  
23  
Algorithmic Methods of Hidden Communication Through Buy Orders and Sales on International Stock Exchanges  
*Arkadiusz Liber*  
33  
SELM: Software Engineering of Machine Learning Models  
*Nafiseh Jafari, Mohammad Reza Besharat and Maryam Hourali*  
48  
Feature Reuse Across Software Releases During Software Evolution  
*Cezary Boldak, Stanislaw Jarzabek and Junling Seow*  
55  

## Chapter 2. Software Systems Security and Techniques

Protecting the Sharing and Distribution of Color Images Hosted in Cloud Storage Services  
*Manuel Cedillo-Hernandez, David Mata-Mendoza, Diana Nuñez-Ramirez, Elizabeth Campos-Ponce, Eduardo Fragos-Navarro, Mariko Nakano-Miyatake and Hector Perez-Meana*  
71  
Formal and Automatic Security Policy Enforcement on Android Applications by Rewriting  
*Marwa Ziadia, Mohamed Mejri and Jaouhar Fattahi*  
85  
Extreme Gradient Boosting for Cyberpropaganda Detection  
*Jaouhar Fattahi, Mohamed Mejri and Marwa Ziadia*  
99  
The Bane of Generate-and-Validate Program Repair: Too Much Generation, Too Little Validation  
*Besma Khaireddine, Aleksandr Zakharchenko and Ali Mili*  
113  
LSTM Neural Networks for Detecting Anomalies Caused by Web Application Cyber Attacks  
*Igor Kotenko, Oleg Lauta, Kseniya Kribel and Igor Saenko*  
127
A Massively Parallel Approach to Automated Software Correctness Enhancement in Java
Aleksandr Zakharchenko, Besma Khaireddine and Ali Mili

Cyber Racism Detection Using Bidirectional Gated Recurrent Units and Word Embeddings
Jaouhar Fattahi, Marwa Ziadia and Mohamed Mejri

Chapter 3. Formal Techniques for System Software and Quality Assessment

Building Normalized Systems from Domain Models in Ecore
Marek Suchánek, Herwig Mannert, Peter Uhnák and Robert Pergl

New Model for Handling Inconsistency Issues in DL-Lite Knowledge Bases
Ghassen Hamdi and Mohamed Nazih Omri

Formal Event-B Modeling of the MICONIC Application
Sabrine Ammar and Mohamed Tahar Bhiri

Integrating Quality Assessment Through Metrics into Scrum Software Development
Sirine Zaouali and Sonia Ayachi Ghamouchi

Effort Estimation in Agile Software Development: A Systematic Mapping Study
Nour elhouda Farih, Khalid Nafil and Rochdi El Messousi

Engineering Platform as Integrated Software for Model Mediated Research
László Horváth and Levente Kovács

Toward the Formalization of Business Process Model and Notation
Honoré Hournwanou, Laila Boumliki and Mohamed Mejri

Chapter 4. Applied Intelligence in Software

Introducing Interactivity in Disaster Recovery Simulations
Mina Abadeer, Sameh Magharious and Sergei Gorlatch

An Ontology for Modeling Vehicle Routing Problems
Syrine Belguith, Soulef Khalfallah and Ouajdi Korbaa

LSTM-Based Mosquito Genus Classification Using Their Wingbeat Sound
Edmundo Toledo, Jose Gonzalez, Mariko Nakano, Daniel Robles, Adrian Hernandez, Hector Perez, Humberto Lanz and Jorge Cime

Acoustic Scenery Recognition Using CWT and Deep Neural Network
Francisco Mondragon, Jonathan Jimenez, Mariko Nakano, Toru Nakashika and Hector Perez-Meana

Towards a New Approach for Intelligent BPM Based on Technologies 4.0
Sarra Mejri and Sonia Ayachi Ghamouchi

A Deep Transfer Learning Approach for Flow-Based Intrusion Detection in SDN-Enabled Network
Phan The Day, Nghi Hoang Khoa, Hoang Hiep, Nguyen Ba Tuan, Hien Do Hoang, Do Thi Thu Hien and Van-Hau Pham
Chapter 5. Intelligent Decision Support Systems

Improving Euclidean’s Consensus Degrees in Group Decision Making Problems Through a Uniform Extension
J.M. Tapia, F. Chiclana, M.J. Del Moral and E. Herrera-Viedma

Bio-Informatic Model of Tyrosine Kinases Inhibitors in Trabecular Meshwork Cells
Jorge Santiago, Cristhian Romero, Santiago Guerrero, Francisco Trejo and Daniel Robles

AFL: Adaptive Federated Learning Based on Personalized Model and Adaptive Communication
Xing Wu, Fei Xiang Liu, Yue Zhao and Ming Zhao

An Empirical Investigation of Online News Classification on an Open-Domain, Large-Scale and High-Quality Dataset in Vietnamese
Khanh Quoc Tran, Phap Ngoc Trinh, Khoa Nguyen-Anh Tran, An Tran-Hoai Le, Luan Van Ha and Kiet Van Nguyen

Skeleton-Based Action Recognition with Joint Coordinates as Feature Using Neural Oblivious Decision Ensembles
Fakhrul Aniq Hakimi Nasrul ’Alam, Mohd. Ibrahim Shapiai, Uzma Batool, Ahmad Kamal Ramli and Khairil Ashraf Elias

Proctors Assignment at the University of Information Technology – VNU HCM
Thien-Y Huynh, Son-Lam Nguyen, Hoang-Long Nguyen, Trong-Hop Do and Thanh Binh Nguyen

Chapter 6. Document Analytics Based Systems

An Effective AQI Estimation Using Sensor Data and Stacking Mechanism
Dat Q. Duong, Quang M. Le, Tan-Loc Nguyen-Tai, Hien D. Nguyen, Minh-Son Dao and Binh T. Nguyen

Cavitation Flow Simulation and Experiment Research in Inducer
Liang Zhou, Longxian Li and Kexin Li

Adaptive Ranking Relevant Source Files for Bug Reports Using Genetic Algorithm
Thi Mai Anh Bui and Nhat Hai Nguyen

Multi-Level Sentiment Analysis of Product Reviews Based on Grammar Rules
Hien D. Nguyen, Thanh Le, Khiem Tran, Son T. Luu, Suong N. Hoang and Hieu T. Phan

Chapter 7. Knowledge Science and Intelligent Computing

Experiment of OCITN: Considering Appropriate Goal Images and Metric for One-Class Image Transformation Network
Toshitaka Hayashi and Hamido Fujita
Complementary Object Tracking Using Average Peak-to-Correlation Energy
*Kosuke Honda and Hamido Fujita*

Emotion Regulation Music Recommendation Based on Feature Selection
*Xiaoliang Gong, Ruïyi Yuan, Hut Qian, Yufei Chen and Anthony G. Cohn*

Incorporating Attention Mechanism in Enhancing Classification of Alzheimer’s Disease
*Nur Amirah Abd Hamid, Mohd Ibrahim Shapiai, Uzma Batool, Ranjit Singh Sarban Singh, Muhammad Kamal Mohammed Amin and Khairil Ashraf Elias*

A Deep Local and Global Scene-Graph Matching for Image-Text Retrieval
*Manh-Duy Nguyen, Binh T. Nguyen and Cathal Gurrin*

Analysing the Performance of Stress Detection Models on Consumer-Grade Wearable Devices
*Van-Tu Ninh, Sinéad Smyth, Minh-Triet Tran and Cathal Gurrin*

Brain Tumor Classification Using Modified VGG Model-Based Transfer Learning Approach
*Arpit Kumar Sharma, Amita Nandal, Liang Zhou, Arvind Dhaka and Tao Wu*

**Chapter 8. Ontology in Data and Software**

Semantics-Based Scheduling Approach of Ontology-Based Real-Time DBMS
*Fehima Achour, Wassim Jaziri and Emna Bouazizi*

Ontological Data Replication in a Distributed Real-Time Database System
*Wided Ben Abid, Mohamed Ben Ahmed Mhiri, Emna Bouazizi and Faiez Gargouri*

A Performance-Based Dispatching Rule for Decentralised Manufacturing Planning and Production Control System
*Maria Grazia Marchesano, Silvestro Vespoli, Guido Guizzi, Valentina Popolo and Andrea Grassi*

A BPM-Based Agile Approach to Ensure Adaptive Learning
*Nisseb Bergaoui and Sonia Ayachi Ghannouchi*

An Efficient Cloud Framework for Multi-Robot System Management
*Raihan Kabir, Yutaka Watanobe, Keita Nakamura, Rashadul Islam and Keitaro Naruse*

Vietnamese Complaint Detection on E-Commerce Websites
*Nhung Thi-Hong Nguyen, Phuong Phan-Dieu Ha, Luan Thanh Nguyen, Kiet Van Nguyen and Ngan Luu-Thuy Nguyen*

**Chapter 9. Machine Learning in Systems Software**

Similarity Learning for CNN-Based ASL Alphabet Recognition
*Atoany Nazareth Fierro Radilla, Karina Ruby Perez Daniel, Gibran Benitez-Garcia, Pedro Najera García and Ramona Fuentes Valdez*
The Construction and Application of Online Programming Learning System with Interactive Video Based on Semantic Web  

_Dai kaiyu, Mao Haoran and Zhangrui_

646

Fingerprint Recognition System Based on Bifurcation Minutiae  

_Alberto Antonio Vargas Mata, Jesús Olivares Mercado, Linda Karina Toscano Medina, Gabriel Sánchez Pérez and Héctor Manuel Pérez Meana_

660

Problem of Inconsistency and Default Consistency Rules  

_David Šenkýř and Petr Kroha_

674

A Rank Based ACO Approach for Optimal Resource Allocation and Scheduling in FMS Modeled with Labelled Petri Net  

_Amira Jabloui, Hichem Kmisech, Layth Sliman and Lotfi Nabli_
