NEW TRENDS IN INTELLIGENT SOFTWARE METHODOLOGIES, TOOLS AND TECHNIQUES

Applied intelligence, integrated with software, is an essential enabler for science and the new economy, creating new markets and new directions for a more reliable, flexible and robust society and empowering the exploration of our world in ever more depth. The available software, however, often falls short of expectations, with current methodologies, tools, and techniques still neither robust enough nor sufficiently reliable to adequately serve a constantly changing and evolving market.

This proceedings presents 40 papers delivered at SoMeT 24, the 23rd edition of the International Conference on New Trends in Intelligent Software Methodology Tools, and Techniques, held on 24 and 25 September 2024 in Cancun, Mexico. The conference explored new trends and theories, illuminating the direction of developments by discussing issues ranging from research practices to techniques and methodologies and proposing and reporting on the solutions needed for global world business, and this book aims to capture the essence of a new state-of-the-art in software science and its supporting technologies, and to identify the challenges that such technologies will have to master. The 40 papers included here were carefully selected following a thorough review process on the basis of technical soundness, relevance, originality, significance, and clarity, whereby each paper was reviewed by three or four reviewers.

The book brings together the work of scholars from the international research community, and will be of interest to all those working in the field of intelligent software methodology, tools, and techniques.

**NEW TRENDS IN INTELLIGENT SOFTWARE
METHODOLOGIES, TOOLS AND TECHNIQUES**

Frontiers in Artificial Intelligence and Applications

The book series Frontiers in Artificial Intelligence and Applications (FAIA) covers all aspects of theoretical and applied Artificial Intelligence research in the form of monographs, selected doctoral dissertations, handbooks and proceedings volumes. The FAIA series contains several sub-series, including 'Information Modelling and Knowledge Bases' and 'Knowledge-Based Intelligent Engineering Systems'. It also includes the biennial European Conference on Artificial Intelligence (ECAI) proceedings volumes, and other EurAI (European Association for Artificial Intelligence, formerly ECCAI) sponsored publications. The series has become a highly visible platform for the publication and dissemination of original research in this field. Volumes are selected for inclusion by an international editorial board of well-known scholars in the field of AI. All contributions to the volumes in the series have been peer reviewed.

The FAIA series is indexed in ACM Digital Library; DBLP; EI Compendex; Google Scholar; Scopus; Web of Science: Conference Proceedings Citation Index – Science (CPCI-S) and Book Citation Index – Science (BKCI-S); Zentralblatt MATH.

Series Editors:

Nicola Guarino, Pascal Hitzler, Joost N. Kok, Jiming Liu, Ramon López de Mántaras, Riichiro Mizoguchi, Mark Musen, Sankar K. Pal, Ning Zhong

Preface

Applied intelligence, integrated with software, is an essential enabler for science and the new economy. It creates new markets and new directions for a more reliable, flexible and robust society. It empowers the exploration of our world in ever more depth. However, software often falls short of our expectations. Current software methodologies, tools, and techniques remain neither robust enough nor sufficiently reliable for a constantly changing and evolving market, and many promising approaches have proved to be no more than case-by-case oriented methods that are not fully automated.

This book explores new trends and theories which illuminate the direction of developments in this field which we believe will lead to a transformation in the role of software and science integration in tomorrow's global information society. By discussing issues ranging from research practices to techniques and methodologies and proposing and reporting on the solutions needed for global world business, it offers an opportunity for the software-science community to think about where we are today and where we are going.

The book aims to capture the essence of a new state-of-the-art in software science and its supporting technologies, and to identify the challenges that such technologies will have to master. It contains extensively reviewed papers presented at the 23rd edition of the International Conference on New Trends in Intelligent Software Methodology Tools, and Techniques, (SoMeT_24) held in Cancun, Mexico, with the collaboration of University of Instituto Politécnico Nacional, Mexico, from 24 to 25 September 2024, <https://atenea.esimecu.ipn.mx/>

SoMeT_24 is celebrating its 23rd edition,¹ and the 2024 event was supported by the i-SOMET Incorporated Association, (www.i-somet.org) established by Prof. Hamido Fujita.

This edition of the conference brought together researchers and practitioners to share their original research results and practical development experience in software science and related new technologies. It forms part of the conference and the SoMeT series, providing an opportunity for the exchange of ideas and experiences in the field of software technology, opening up new avenues for software development, methodologies, tools, and techniques, particularly with regard to intelligent software, by applying artificial intelligence techniques in software development, and tackling human interaction in the development process for better high-level interface. The emphasis has been placed on human-centric software methodologies, end-user development techniques, and emotional reasoning, for an optimally harmonized performance between

the design tool and the user. The word “intelligent” in SOMET emphasizes the need for the consideration of artificial intelligence issues in software design for systems application, for example, in disaster recovery and other systems supporting civil protection.

A major goal of this publication was to assemble the work of scholars from the international research community which discuss and share research experiences of new software methodologies and techniques. One of the important issues addressed is the handling of cognitive issues in software development so as to adapt it to the user’s mental state, and tools and techniques related to this aspect form part of the contributions to this book. Other subjects raised at the conference were intelligent software design in software ontology, and conceptual software design in the practice of human-centric information system application.

The book also investigates other theories and practices in software science, including emerging technologies from their computational foundations in terms of models, methodologies, and tools. This is essential both for a comprehensive overview of information systems and research projects, and to assess their practical impact on real-world software problems. This represents another milestone in mastering the new challenges of software and its promising technology addressed by the SoMeT conferences, and provides the reader with new insights, inspiration and concrete material to further the study of this new technology.

The book is a collection of carefully selected papers, refereed by the reviewing committee listed, the members of which carefully selected revised articles of the highest quality for publication. Referees from the program committee first carefully reviewed all the submissions received, and 40 papers were selected on the basis of technical soundness, relevance, originality, significance, and clarity. These were then revised on the basis of the review reports before being selected by the SoMeT_24 international reviewing committee, with each paper being reviewed by three or four reviewers.

This book is the result of a collective effort from many industrial partners and colleagues throughout the world. We would like to express our gratitude for the support provided by the University of Instituto Politécnico Nacional, Mexico and to all those authors who contributed their invaluable support to this work. Most especially, we wish to thank the program committee, reviewing committee and all those who participated in the rigorous reviewing process and the lively discussion and evaluation meetings which led to the selection of the papers which appear in this book. Last, but not least, we would also like to thank the Microsoft Conference Management Tool team for their expert guidance on the use of the Microsoft CMT System as a conference-support tool during all the phases of SoMeT_24.

Contents

Preface	v
About the Conference	vii
Chapter 1. Software System with Intelligent Design	
Proposal for a Novel Sightseeing Trip Plan Search Service <i>Jun Sasaki</i>	3
Design a Knowledge Chatbot System in Education Based on Ontology Approach <i>Hung Nguyen, Thao T.N. Le, Hau Nguyen, Long D. Nguyen, Dung Dinh, Vuong T. Pham and Hien D. Nguyen</i>	15
Frame-Level Deepfake Detection on Explicit Content with ID-Unaware Binary Classification <i>Miguel Jimenez-Martinez, Gibran Benitez-Garcia, Linda Karina Toscano-Medina and Jesus Olivares-Mercado</i>	29
Chapter 2. Software System Security and Techniques	
Detecting and Mitigating the Weakest Cybersecurity Link in an Information System <i>Ali Sadeghian and Mohamed Mejri</i>	45
Encryption and Compression Scheme Using Compressing Sensing and Chaotic Mixing <i>Fermin del Valle-Vega, Enrique Escamilla-Hernandez, Mariko Nakano-Miyatake and Hector Perez-Meana</i>	60
Cyberbullying Detection Using Bag-of-Words, TF-IDF, Parallel CNNs and BiLSTM Neural Networks <i>Jaouhar Fattahi, Ferial Sghaier, Mohamed Mejri, Sahbi Bahrour, Ridha Ghayoula and Elyes Manai</i>	72
Information Encryption with Combined QR Codes with Two Security Levels: GPG Method and Chromatic Multiplexing <i>Paola Noemi San Agustín Crescencio, Leobardo Hernández González, Pedro Guevara López, Jazmin Ramirez Hernández and Eduardo Salvador Estevez Encarnación</i>	85
Data Hiding Components for Solving Information Security Issues in DICOM Medical Images <i>Juan Eduardo Mosco-Garcia and Manuel Cedillo-Hernandez</i>	99

URL Phishing Detection by Using Natural Language Processing and Deep Learning Model	110
<i>Clive Lai, Ali Selamat, Roliana Ibrahim, D.N. Quang, Hamido Fujita and Ondrej Krejcar</i>	

Chapter 3. Formal Techniques for System Software and Quality Assessment

Extended Engineering Software Support for Multiphysical Research in Applied Informatics	123
<i>László Horváth and Levente Kovács</i>	
Transformation Approach for Safe Source Code Through the Application of a Large Language Model and Adaptation of a Generative Adversarial Network	137
<i>Aldo Hernandez-Suarez, Hector Manuel Perez-Meana, Gabriel Sanchez-Perez, Jose Portillo-Portillo, Jesus Olivares-Mercado and Linda Karina Toscano Medina</i>	
Towards an Architecture Modeling Language for Specifying Digital Twin Architectures Using C4	151
<i>Mert Ozkaya</i>	
Analysis of the Nozzle Design for Rocket-Candy Using a Systemic Model	165
<i>Alejandro Pisil-Carmona, Diego-Alfredo Padilla-Pérez, Carlos Couder-Castañeda, Emilio-Noe Jiménez-Navarro and Arturo Solis-Santome</i>	

Chapter 4. Applied Intelligence in Software

Improve Breast Cancer Classification Based on Deep Feature Fusion and Hyperparameter Customization Using Transfer Learning	177
<i>Thanh-An Pham, Tien-Anh Nguyen, Quang-Vinh Tran and Van-Dung Hoang</i>	
Practical Application of Deep Reinforcement Learning in Physical Robotics	189
<i>Carlos Vasquez, Mariko Nakano and Martin Velasco</i>	
Preference-Based Reinforcement Learning Framework for Autonomous Vehicles	203
<i>Dake Ding, Nnadi Leonard Chukwualuka, Raihan Kabir and Yutaka Watanobe</i>	
Hands and Palms Recognition by Transfer Learning for Forensics: A Comparative Study	213
<i>Jaouhar Fattahi, Obeb Fkiri, Mohamed Mejri and Ridha Ghayoula</i>	
Dynamic Convolution Based Intelligent Algorithm for YOLOv5 Underwater Target Detection	226
<i>Jialing Jiang, Bo Huang, Zhijun Fang and Yongbin Gao</i>	
Machine Learning-Based Approach to Correct Saturated Flow Boiling Heat Transfer Correlations	235
<i>Edgar Santiago Galicia, Andres Hernandez Matamoros and Akio Miyara</i>	

Optimal Feature Extractor for Video Anomaly Detection in Public Transportation Applications	249
<i>Jonathan Flores-Monroy, Gibran Benitez-Garcia, Mariko Nakano and Hiroki Takahashi</i>	
Optimizing Industrial Maintenance Scheduling Through Deep Reinforcement Learning and Simulation Integration	263
<i>Maria Grazia Marchesano, Guido Guizzi, Giuseppe Converso, Emma Salatiello and Valentina Popolo</i>	
Chapter 5. Intelligent Decision Support Systems	
A Large-Scale Group Decision-Making Approach Employing Large Language Models to Detect Assertive Groups	279
<i>Santiago Carbó-García, José Ramón Trillo, Juan Miguel Tapia, Ignacio Javier Pérez, Enrique Herrera-Viedma and Francisco Javier Cabrerizo</i>	
ICERS: Intelligent Collaborative Emergency Response System	293
<i>Guoyin Yang, Haotian Zhang, Junfeng Yao, Chengyou Cai, Jun Song, Yuelin Xu and Bin Deng</i>	
Chapter 6. Cyber Physical System	
Voice Gender Recognition Under Unconstrained Environments Using Fine-Tuned CNNs	305
<i>Jorge Jorrin-Coz, Mariko Nakano, Jonathan Flores-Monroy and Hector Perez-Meana</i>	
ViFam: A New Dataset for Fall Detection Problem and Overall Analysis	318
<i>Thao V. Ha, Quynh T.N. Nguyen, Dung V. Huynh, Huy Q. Truong, Quang C. Tran, Hien D. Nguyen and Binh T. Nguyen</i>	
Adaptive WIP Control in Industry 4.0 Manufacturing via Deep Reinforcement Learning: A Case Study in Hybrid Control Architectures	332
<i>Silvestro Vespoli, Giulio Mattera, Guido Guizzi, Liberatina Carmela Santillo and Luigi Nele</i>	
Chapter 7. Knowledge Science and Intelligence Computing	
Topic Modeling in the Darknet via Semi-Supervised Learning and Linguistic Transformers	351
<i>Aldo Hernandez-Suarez, Hector Manuel Perez-Meana, Gabriel Sanchez-Perez, Jose Portillo-Portillo, Jesus Olivares-Mercado and Linda Karina Toscano-Medina</i>	
Sentiment Classification in Mobile Gaming Reviews: Customized Transformer Models with Emojis Retained	365
<i>Minh Tri Doan, Minh Phuong Dam, Tram T. Doan, Hung Nguyen and Binh T. Nguyen</i>	

Optimizing Feature Selection with Metaheuristics: Trends, Techniques, and Future Directions	378
<i>José Barrera-García, Felipe Cisternas-Caneo, Broderick Crawford, Mariam Gómez Sánchez, Ricardo Soto, Marcelo Becerra-Rozas, José Manuel Gomez-Pulido and Alberto Garces-Jimenez</i>	
Use of Modeling & Simulation and AI for Collaborative Framework: SMEs Supply Chain Disruptions	392
<i>Roberto Revetria, Lorenzo Damiani, Anastasiia Rozhok and Khursheed Ahmad</i>	
Meaningful Performance Analysis on Healthcare Data Under Local Differential Privacy	398
<i>Andres Hernandez-Matamoros and Hiroaki Kikuchi</i>	
Analyzing Twitter Data for Insights into Public Sentiment During COVID-19 Pandemic	412
<i>Yang Liu and Mohd Anwar</i>	
Chapter 8. Ontology in Data and Software	
Recognition of Handwritten Tamazight Characters Using ResNet, MobileNet and VGG Transfer Learning	429
<i>Jaouhar Fattahi, Ferial Sghaier, Mohamed Mejri, Elyes Manai and Ridha Ghayoula</i>	
Attention-Based Multi-Scale, Context-Aware Feature Integration into PoseResNet for Coordinate Classification in 2D HPE	441
<i>Ali Zakir, Sartaj Ahmed Salman, Gibran Benitez-Garcia and Hiroki Takahashi</i>	
Chapter 9. Machine Learning in System Software	
Fingerprint Fraud Explainability Using Grad-Cam for Forensic Procedures	457
<i>Elyes Manai, Mohamed Mejri and Jaouhar Fattahi</i>	
Detection and Identification of Respiratory Disease Using DWT and SVM	471
<i>Elizabeth Garcia Rios, Enrique Escamilla Hernandez, Angela Gabriela Espino Lopez, Héctor Manuel Perez Meana and Lorena Mendoza Guzman</i>	
Image Splicing Detection Based on a Dual Branch Neural Network	482
<i>Ana Elena Ramirez-Rodriguez, Rodrigo Eduardo Arevalo-Ancona, Hector Perez-Meana, Mariko Nakano-Miyatake and Manuel Cedillo-Hernandez</i>	
One-Class Classification Approach Using One-Class Classification Subtask	493
<i>Toshitaka Hayashi, Dalibor Cimr and Richard Cimler</i>	
Multimodal Hand Gesture Recognition Using Automatic Depth and Optical Flow Estimation from RGB Videos	506
<i>Gibran Benitez-Garcia and Hiroki Takahashi</i>	

PFMNet: Face Mask Recognition with Deformable Convolution Networks and Category Attention	520
<i>Ulises Arroyo-Rojas, Gibran Benitez-Garcia, Jesus Olivares-Mercado, Gabriel Sanchez-Perez and Hiroki Takahashi</i>	
Subject Index	535
Author Index	537
